Iteration 2 Release

About Us:

HelpMeOut is a website that connects people who are looking for some help doing basic tasks that they themselves do not want to do. People who help out are paid in cash money to compensate them for completing their task.

Features that were not completed by Iteration 2:
- The Design of the website is not finalized yet and will probably go through an edit for the next iteration. So while the website has a look, we can't honestly say it's "fully done" yet.
- You must refresh or even relog to see some changes made in the settings page or in tokens. This will be fixed in Iteration 3.
- Changing profile pic while the code is there does not currently work.
- Anything that is not listed in the Android Notes doesn't work.

Websites Notes:
- Some of the jobs posted on the server are by us, so check to see who posted a job before you try accepting one as we may not check the server to see your request.
- We have not prepared test account for you. Feel free to make multiple accounts though just in case no one in your group wants to do your job!
- You **don't** need a paypal to buy tokens!!! Just go ahead and buy, we've disabled that feature for testing purposes.
- If you have trouble with anything or have any questions post an issue on GitHub. We like issues and will respond quickly.

Android Notes:
- Functionality for the android app is as follows
  - sign up
  - login
  - get job (look at available jobs)
  - offer help for a job

- ○ Post job
- ○ Jobs I Need (Look at jobs you need done, complete them, cancel them, and accept/decline people offering their help)
- ○ Jobs I'm Doing (Look at contact information for the person for job your helping and cancel the job if you can't fufill it)
- ○ Sign Out
- The app should pull custom profile picture if you set it on the web.
